SUMMARY

Results-oriented Electronics & Communication Engineering undergraduate with strong proficiency in Full Stack Development. Expertise in architecting scalable web applications using the MERN stack, Next.js, and Python. Adept at leveraging cloud technologies and AI integrations to solve complex problems. Seeking to contribute technical acumen and innovative thinking to a dynamic engineering team.

SKILLS

Languages	Java, Python, JavaScript (ES6+), TypeScript, C, SQL
Frameworks	Next.js, React.js, Node.js, Express.js, Bootstrap, Tkinter, Tailwind CSS
Databases	MySQL, MongoDB, Firebase (Firestore, Auth, Realtime DB)
Tools & Cloud	Git, GitHub, Docker, Postman, AWS (Basic), OpenAI API, Linux
Core Concepts	DSA, OOPs, DBMS, Computer Networks, REST API Architecture

EXPERIENCE

Web Development Intern	Dec 2024 – Jan 2025
CodeClause	Remote
- Engineered a dynamic music player application using HTML, CSS, and JavaScript with a focus on responsive UI/UX. - Implemented complex state management logic to handle playlist creation, song shuffling, and skip functionalities. - Optimized DOM manipulation strategies, resulting in smooth transitions and zero lag during user interactions.	

PROJECTS

EduBH - EdTech Consultation Platform Next.js, TypeScript, Firebase	🔗 Visit
- Engineered a high-performance educational platform using Next.js and TypeScript, ensuring type safety and scalability. - Integrated Firebase to manage real-time databases for dynamic content and secure student enquiry handling. - Designed an immersive, responsive UI incorporating advanced 3D design elements and lead generation pipelines.	
Real-Time Chat Application Java, Android Studio, Firebase	🔗 Repo
- Built a responsive mobile chat application featuring real-time messaging and status updates via Firebase Cloud Messaging. - Optimized RecyclerView performance and implemented image caching, reducing data usage by 30%.	
AI Movie Recommender Node.js, Express, OpenAI API	🔗 Repo
- Designed an intelligent recommendation engine leveraging OpenAI's GPT models to suggest movies based on user mood. - Constructed a robust backend using Node.js to bridge user inputs with the AI model via secure API calls.	
Library Management System (LMS) Python, Tkinter, SQL	🔗 Repo
- Developed a full-featured desktop application using Python and Tkinter with a GUI for library inventory management. - Architected a SQL database schema to execute efficient CRUD operations (Add, Issue, Return) with data persistence.	

EDUCATION

B.Tech in Electronics & Communication Engineering	2021 – 2025
B. P. Poddar Institute of Management And Technology, Kolkata	CGPA: 8.08/10.0
Class 12th (ISC) St. Stephen's School, Dum-Dum	87.5% 2021
Class 10th (ICSE) St. Stephen's School, Dum-Dum	87.3% 2019

CERTIFICATIONS

Generative AI (Great Learning)	July 2024
Azure Fundamentals (Microsoft)	Nov 2023
Google Cloud Engineering Track	Dec 2022
Python Programming (Udemy)	May 2022

POSITIONS OF RESPONSIBILITY

Start-Up Coordinator	2022 – 2024
Institution's Innovation Council (IIC) - BPPIMT	
- Orchestrated entrepreneurship awareness drives and hackathons, fostering an innovation-driven ecosystem on campus. - Managed event logistics and coordinated between faculty and student volunteers for seamless execution of workshops.	
Core Member	2023 – 2024
Google Developer Groups (GDG) - Kolkata	
Collaborated with the core team to organize large-scale tech meetups and workshops, managing logistics for 200+ attendees.	

SELF DECLARATION

I hereby declare that all the information provided in this curriculum vitae is true and correct to the best of my knowledge and belief. I take full responsibility for the accuracy of the particulars mentioned herein.
