

AKASHAT OJHA

Software Engineer

📅 05 December 2002 @ akashatojha2002@gmail.com 📞 +91 9874510316
📍 14, J. N. Tewari Road, Dum-Dum, Kolkata, India 🌐 akashatojha 🔄 Akashat-02-Dev

SUMMARY

Quality-driven Software Engineer with a strong hands-on development foundation in Java, distributed systems, and microservices. Proven expertise in building testable, fault-tolerant architectures and driving software quality through automated testing, API contracts, and event-driven application design.

EXPERIENCE

Software Engineer

Adroit BI

📅 Jul 2025 – Present 📍 Remote

- Architected and deployed 4 decoupled backend microservices, establishing OpenAPI REST contracts and integration test strategies that reduced post-deployment integration bugs by 60%.
- Engineered fault-tolerant data pipelines and automated reporting workflows, ensuring high data availability and monitoring production environments for continuous quality feedback.
- Collaborated with cross-functional teams in an Agile environment to optimize API gateways, ensuring system reliability under loads of 10K+ monthly active users.
- Integrated automated code checks and performance testing to reduce end-to-end latency by over 40%, advocating for a quality-first development culture.

Web Development Intern

Code Clause

📅 Dec 2024 – Jan 2025 📍 Remote

- Engineered an optimized, modular streaming client enforcing strict type definitions to eliminate runtime errors and ensure high conditional code coverage.
- Conducted deep performance analysis and refactored core algorithmic logic for DOM rendering, systematically reducing UI time complexity and achieving a 94/100 Lighthouse performance score.

PROJECTS

Real-Time Chat Application

High-Reliability Messaging

Tech: Java, Android, Event-Driven Architecture

- Designed a robust, event-driven messaging architecture using Java, engineered for extreme reliability across varying mobile network conditions.
- Implemented client-side caching algorithms and paginated data fetching strategies, achieving a low-latency 300ms average payload delivery.

Apex Business Suite

Enterprise ERP & CRM Ecosystem

Tech: Node.js, Firebase, JavaScript, Android (Kotlin), Netlify

- Architected a cross-platform ERP/CRM ecosystem featuring a Node.js multi-tenant API hub and an Android native WebView container.
- Implemented dual Firebase/mock authentication with offline fallbacks and engineered interconnected micro-service modules for CRM, HRMS, and Finance.

LEADERSHIP

Start-Up Coordinator

Institution's Innovation Council (IIC)

📅 2022 – 2024 📍 BPPIMT

- Organised 6+ entrepreneurship drives and hackathons; contributed to the institute's recognition under the Ministry of Education's Innovation Cell framework.

EDUCATION

B.Tech in Electronics & Communication Engineering

B. P. Poddar Institute of Management & Technolgy

📅 Oct 2021 – Jul 2025 📍 Kolkata, India

- CGPA: 8.08
- Coursework: Data Structures, Analysis of Algorithms, OOP, Computer Networks, DBMS.

TECHNICAL SKILLS

Java Go Node.js Python TypeScript
JavaScript (ES6+) React.js C SQL

Unit & Integration Testing
Test Automation Strategy
Code Coverage Tools
Performance Testing Postman

Microservices RESTful APIs
Event-Driven Applications
OpenAPI AWS (EC2, S3, Lambda)

Agile Methodology CI/CD
Git Docker Linux
Fault-Tolerant System Design

CERTIFICATIONS

- Generative AI – Great Learning Jul 2024
- Azure Fundamentals – MLSA, BPPIMT Nov 2023
- Google Cloud Engineering Track – GDSC Dec 2022
- Python Programming – Udemy May 2022

HONOURS

Speaker

IIT Kharagpur Research Park

📅 Nov 2025

- Represented 'Team Brahmastra Robotics' demonstrating hardware-software integration and reliability testing for self-engineered robotic systems.

Hackathon 1st Runner-up

Technical Hackathon

📅 Mar 2023

- Architected and deployed a full-stack, fault-tolerant web application under strict time constraints, prioritizing system reliability and code quality.
